Penn College NOW DUAL ENROLLMENT

Pennsylvania College of Technology, an affiliate of The Pennsylvania State University, offers qualified students the chance to earn Penn College credits while in high school.

HOW IT WORKS

What is Penn College NOW?
Penn College NOW is a program that allows qualified high school students to earn Penn College credits during their school day.

What is the tuition cost?
Penn College NOW tuition is free. Lab and application fees are waived.

Where are courses taught?
Courses are taught at your high school or career and technology center during the high school day.

Who teaches the courses?
High school teachers, approved by Penn College, will teach the courses.

How can I be assured that this course is the same as a course taught at Penn College?
Penn College approves the course. By working with college faculty, the high school teachers ensure that the Penn College NOW courses and Penn College courses are the same quality.

At what grade level can I participate?
Generally, 11th and 12th grade students are eligible to participate in the program. Some academic courses are limited to seniors only. A limited number of courses are available to 10th grade students.

Who should take these courses?
You and your parents or guardians should assess if you are a suitable candidate for college courses. Your high school counselor can help in this assessment. Consistent attendance is critical. Per federal financial aid guidelines, failing a course or late withdrawal from a course may impact future financial aid eligibility once you enter college after high school.

How do I qualify?
Each student must pass the Penn College placement test in reading. Some courses also require placement testing in mathematics and English. These tests will be offered through your school during the school day. Only students who pass the required placement tests may enroll in Penn College NOW courses.

Will my Penn College NOW credits transfer into a Penn College degree program?
Your Penn College NOW credits will appear on an official Penn College transcript and can be applied toward specific Penn College degrees. The major you select impacts how your credits will be applied.

Will my Penn College NOW credits transfer to another college or university?
The extent to which a course will transfer to another college or university is at the discretion of that college or university. Many colleges or universities accept dual enrollment credits; however, how they will count depends on the major that you select.

If interested in Penn College NOW, who should I contact?
To identify your school's contact, visit Penn College NOW at www.pct.edu/k12/pcnow or call 570-520-8003.
